

Matter combines to form different substances

Learning Goal: Compare & contrast the properties of mixtures and compounds.

Matter can be pure or mixed

What is pure matter?

Why is water a pure substance even though it contains two types of atoms?

What is an Element?

What is a Compound?

What is a combination of substances that remain the same individual substances?

Comparing Mixtures & Compounds

Mixtures:

Compounds

How do Mixtures and Compounds compare?

<i>What do we call mixtures that are the same throughout?</i>	
<i>What do we call mixtures that are different throughout?</i>	

I get that! Write a paragraph explaining what you understand from today's lesson.

I need some help with? Write a paragraph explaining what you don't understand about section 1.3.
